### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (6,415,207).

As per claim 4, Jones teaches a database for storing a plurality of customer records (column 1, lines 28-32); a computer processor for accessing the database (figure 2), the computer processor *adapted to* receive inspection data regarding the status of a monitored vehicle (column 1, lines 32-46) and to store the received inspection data in a customer record associated with the monitored vehicle (column 3); and means for receiving electronic requests to access the inspection data for the monitored vehicle from the customer records in the database (figure 2). Jones does not teach the vehicle being a marine vessel. However, it would have been obvious to one skill in the art to implement Jones' invention to any kind of vehicle in order to communicate the status information from the database based on the caller identification information.

As per claims 5 and 11, Jones teaches other types of information pertaining to the status of the vehicle in column 5, lines 14-16, which is considered to be functional equivalent to the exterior and/or interior of a vehicle

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (6,415,207) in view of Barnet et al (5,467,643).

Jones does not teach indicating the status of the bilge pump. However, Barnet teaches it in the abstract. Thus, it would have been obvious to one skill in the art to combine Jones's invention with Barnett's bilge pump indication in order to provide timely detection and notification of cooling system impairment, to allow a vessel operator to take corrective action against marine engine overheating due to cooling system impairment before engine damage or failure occurs.

***Allowable Subject Matter***

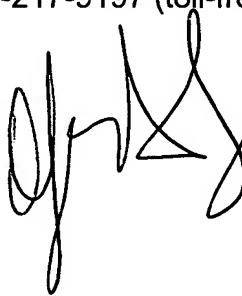

Claims 6-11, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga Hernandez whose telephone number is 571-272-7144. The examiner can normally be reached on Mon-Thu 7:30am-6:00pm.
